

MEEM 5700 DSP General Grading Rubric					
Common Items					Note that the 2-page limit only applies for main body of the report excluding figures and appendices
Formatting	Incomplete. Writer uses informal or vague language. Exceeds page limit over 4 pages.	figure does not related with the discussion beside it. Report exceeds page limits over 2 pages	Minor formatting problems. Exceeds page limit within 2 pages.	The report is well constructed with logic and written in clear and concise language within page limit.	
	0	4	8	10	
Matlab codes (This is most straightforward way to tell if you know the concept)	not attached and appendix		attached as appendix after main report		
	0		10		
Technical Content					Items here are technical content. Only percentage for each item is shown since each assignment has different questions for points to be allocated
Technical Discussion	Didn't answer or irrelevant	Have some significant mistakes but also have part of the question correct	Mainly correct with minor errors	Well supported by material (text or figures) and directly relevant to the topic	
	0%	50%	80%	100%	
Calculation	Didn't answer	Answered but didn't provide quantified solution. Essential equations are wrong	Mainly correct with minor errors	Essential equations are provided and answer is correct.	
	0%	50%	80%	100%	
Figures	Key figures are not included.	Figures are too vague to read and don't have any of captions/axis label/legend	Figures are easy to read. Miss one or two elements (captions/axis label/legend)	Figures are easy to read (proper font size, line weight,etc.), including proper legends, captions, labels for axes.	
	0%	50%	80%	100%
